Dear fellow radio collectors:

It is with great pleasure that I enclose the following additional pages to my catalogue.

My last pages were distributed in June which is six months ago but it seems a lot longer. Many of you have written or taped me and asked, "When may we expect your next listing?" I thank you for your interest in my catalogue. However, that four letter word "time" has prevented me from getting it to you sooner. I hope that it was worth the wait.

You will also note a new method of duplication. I am now typing stencils, and all future pages will be mimeographed.

As you will note on the next page, I have revised my method of determining quality of tapes. Please don't under estimate the listing of "Average." I am sure that most of you will be pleased with this quality show. With this new rating system I have been very selective, and as many of you know I have been requesting as many "Excellent" shows as possible. Many of these will appear under the heading: Average. You will be more than pleased with any Excellent or Hi-Fi listings.

I would like to take this opportunity to mention one program for which I am looking. It is "Archie Andrews." I used to listen to this program on NBC radio, Saturday mornings at 9:00 a.m. CST. I would guess this program was on the air about 1950.

Since I have not seen this show on any list, I hereby offer two hours of material, of your choosing, from my list for every complete, in Average to Hi-Fi condition,  $\frac{1}{2}$  hour program of Archie Andrews. If you have a show which is not complete, or in poorer fidelity please contact me and we can negotiate a trade on that basis.

If some of you have issued pages that I have not received during the past six months I would appreciate hearing from you. I am once again ready to trade. If interested let me hear from you.

Best regards,

Rolfe G. Blaess

IT HAS PROVEN NECESSARY TO REVISE MY METHOD OF DETERMINING THE SOUND QUALITY OF TAPES LISTED IN THIS CATALOGUE. THEREFORE, ALL TAPES FROM NUMBER 473 WILL BE EVALUATED IN MY CATALOGUE AS FOLLOWS:

- HI-FI: A Mark of Excellence. This determination will be used only to denote quality of sound suitable for Broadcast. Approximately 5% of the shows will fall under this heading.
- EXCELLENT: Better than Average, but falling a bit short of Broadcast quality for one reason or another. 20% of the shows will fall into this category.
- AVERAGE: The Median Point of Evaluation will begin with this heading of "Average." Its meaning is exactly as stated. Many of the shows listed as "Excellent." in this catalogue in the past will now be under this heading. Many traders will evaluate some of these shows for their catalogs as Excellent. About 44% of the shows will fall under this heading.
- GOOD: This means a show of Listenable quality. All shows that I feel are "Below Average," in any respect will be determined as "Good." 30% of the shows will fall into this category. In some instances shows under this heading will be off-speed, muffled, too bassy, hum or high background. However, this will usually be stated in the listing.
- POOR: The only reason that a show under this heading would be listed is that the show might be considered "rare" enough to include it.. Normally it is my policy not to list shows of this poor a quality. Only 1% of shows will fall within this grouping.
- + This will indicate a show of slightly better quality than the announced listing, but also falling a little short of the next higher quality.

*Dear Joe,*

For the record it has been exactly one year since I last issued any listings to my catalog, but here is a record breaking - for me at least - 40 pages plus a five page index covering shows 1100 - 1703.

As in the past all the catalogs are mailed at the same time.

I wish to again thank those who have kept me on their mailing lists without receiving a catalog from me for such a long time. ~~If I have not received any of your late pages, I would like to request a copy of them at this time.~~

I shall look forward to hearing from all of you for future trades.

Best regards,

*Rolfe*

Hi radio collectors:

Enclosed you will find 30 additional pages to my catalog, plus an index covering all the shows in my collection through #1105.

As many of you know, my pages do not roll out real frequently. However, you'll have to agree when I get the job done, you get quite a few pages. As in the past all of my catalogs are mailed at the same time to everyone.

Incidentally, if you receive a copy of this catalog and are no longer interested in old time radio or in receiving this catalog a note would be appreciated and I'll remove your name from my mailing list.

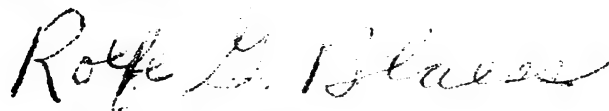

I wish to thank those of you that have kept me on their mailing lists without receiving a catalog from me in such a long time. If I have not received any of your late pages, I would like to request a copy of them now.

I'd like to discuss my preferences for trading:

1. Tape: Name Brand Only. 1 Mil. Mylar or Polyester base. I use Scotch #150, but will also accept Ampex 641, Irish, or Audiotape. Incidentally no white box tape. If you prefer to use this quality of tape, please mail your reels to me and I will be happy to mail blank reels to you for our trade.
2. Speed and Tracking: I prefer my tapes recorded at 3+3/4, quarter track. I will accept two track tapes, but do so reluctantly.
3. When recording my tapes quarter track please do so, one track at a time. I know of no machine on which cross-talk cannot be detected, if two tracks are recorded parallel at the same time. All tapes that I record for you will be done one track at a time to prevent any cross-talk.

I look forward to hearing from many of you for future trades.

Best regards,

Rolfe G. Blaess
